

WHEN IT COMES TO WATER SOLUTIONS, NO LEAKS ARE NO PROBLEM

GET IT ALL AT GAJESKE

With **40 years of expertise**, we supply polyethylene piping systems that define durability.

High-density poly pipe means **zero leaks** and an estimated lifespan of **114 years**. And all that leads to **increased water conservation** and decreased water loss for communities.

Our abrasion-resistant products stand strong against corrosion, bacteria, and chemical build-up generation after generation. Plus, a properly engineered HDPE piping system is less expensive to install than alternative products.

We're the perfect fit for every water application.

If you think Gajeske only supplies polyethylene piping systems, think again. **We supply solutions.**

We offer a complete range of services to assist you with any project that comes your way.

- POLY PIPE, VALVES & FITTINGS
- FUSION EQUIPMENT SALES, RENTALS & REPAIR
